

Letter of Recommendation

I would like to recommend Bini Chand for admission to the graduate program at your university. I have known Bini for about 2 years now as an undergraduate student in BCT Engineering. Moreover, I was the supervisor for her final year project. I taught her Data Communication.

I recall Bini as a confident and responsible student. She maintained excellent academic performance throughout her undergraduate ranking among the Top 5% students of her batch. As an instructor and her supervisor too I had enough opportunity to observe her capabilities closely.

I was the supervisor in her project titled letter generator. I was quite impressed by her hardworking nature and learning capability. I supervised in her project mobile app. I could observe her keen interest and aptitude for research while working on the project. In fact, she was also able to publish a paper on ml.

I have noted her outstanding presentation skills while she presented her work at our department as well as in the conference. I have seen that she has good leadership capability and has a teamwork spirit. She is a very hardworking student who is always eager to learn. She is a well-spoken person with a friendly and gentle personality. She also has given her time to different social causes. She is very helpful and cooperative student. She eagerly handed over her project work to her juniors who wanted to further continue the research on the topic along with proper guidance and resources. I have also been impressed by her communication skills during project presentations and lectures.

I appreciate her technical and professional skills. Besides academics, she was also involved in several extra-curricular activities. She participated in various competitions organized in and off the campus. Unlike, most students who limit their project to an academic exercise, she actually deployed her project publicly in our server and maintained it.

I am quite confident that Bini's skills coupled with academic capability will make her a good candidate for your university. Thus, I would highly recommend her for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required.

Bini Chand,
Professor,
Department of Electronics and Computer Engineering
Pulchowk Campus, Institute of Engineering, Tribhuvan University
