

Assignment Before Next Session

MUST DO BEFORE NEXT CLASS

✓ 1. Install SUI CLI

Make sure you **have SUI CLI installed** on your system. This is absolutely necessary.

✓ 2. Use Faucet to Get Testnet Tokens

After installing the CLI, use the **Sui faucet** to get testnet tokens in your wallet so that you will already have tokens in your wallet in the next session.

- Run this command after setting up your wallet:

```
sui client faucet
```

✓ 3. Deploy the **TicketManagement** Contract

Try to **deploy** the TicketManagement contract we wrote in the class.

- Follow the same steps as shown during the session.
 - If you face any issues, ask in the **Discord group** immediately.
-

📖 Reading Before Next Session

Please read the following lessons as we will proceed with Advanced Sui Move in next session!

♦ Homogeneous Collections: **vector**, **table**

- 📄 GitHub: [Homogeneous Collections](#)
 - 🌐 Book: [Homogeneous Collections - Sui Book](#)
-

♦ Dynamic Fields

-  [Dynamic Fields - Sui Book](#)
-

♦ Heterogeneous Collections: **bag**

-  GitHub: [Heterogeneous Collections](#)
 -  Book: [Heterogeneous Collections - Sui Book](#)
-

 Come prepared! You'll need this understanding for the next session. Don't hesitate to ask for help in Discord.
