

Letter of Recommendation

I would like to strongly recommend Milan G for admission to the graduate program at your university. I have known Milan for about now as an undergraduate student in BCT Engineering. I taught him Data Structure and Algorithm, and Software Engineering.

I recall Milan as a best student. He maintained excellent academic performance throughout undergraduate studies, ranking among the students of his batch. As an instructor and his supervisor I had enough opportunity to observe his capabilities closely.

I supervised him in his project CHATGPT. I could observe his keen interest and aptitude for research while working on the project.

I have noted his good presentation skills while he presented work at our department as well as in conferences. He is a very hardworking student who is always eager to learn. He is very helpful and cooperative, eagerly handing over project work to juniors who wanted to further continue the research with proper guidance and resources. I have also been impressed by his communication skills during presentations and lectures.

I appreciate his technical and professional skills. Besides academics, he was also involved in several extra-curricular activities and participated in various competitions organized in and off campus. Unlike most students who limit their project to an academic exercise, he actually deployed the project publicly in our server and maintained it.

I am quite confident that Milan's skills coupled with academic capability will make him a good candidate for your university. Thus, I would highly recommend him for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required.

DSB,

Cit Admin,
